SUMMARY

Full Stack Developer and AI Automation Engineer with hands-on experience in building scalable web applications and intelligent systems using MERN stack and Python. Strong understanding of RESTful APIs, authentication systems, and cloud integrations. Passionate about solving real-world problems through efficient, secure, and user-centric solutions.

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, PHP, Kotlin, HTML, CSS

Frameworks Libraries: React.js, Next.js, Node.js, Tailwind CSS, Shadcn, Jetpack Compose

Databases: MongoDB, MySQL

Tools Platforms: Git, GitHub, Docker, VS Code, Android Studio, Figma, Canva, n8n

Technologies: REST APIs, JWT Authentication, Firebase, Clerk (Auth), Cloudinary, AI Automation, OpenCV

Deployment: Vercel, Render, Hostinger, cPanel

Security Networking: Kali Linux, Nmap, Metasploitable

EXPERIENCE

Full Stack Developer & AI Automation Engineer

Dec 2025 – Present

Websolvit, Nagpur

- Designed and developed scalable full-stack web applications using React.js, Node.js, and MongoDB.
- Built and integrated RESTful APIs, improving system performance and data flow efficiency.
- Automated business workflows using AI tools and scripting, reducing manual effort by approximately 30%.
- Optimized frontend and backend performance, resulting in faster load times and improved user experience.

Gemini Student Ambassador

Oct 2025 – March 2025

Google (AI Skills House)

- Promoted AI technologies by organizing workshops and technical sessions for students.
- Increased student engagement in AI development initiatives and community activities.

UI/UX Design Intern

May 2025 – July 2025

Yugant Pvt. Ltd.

- Created wireframes, prototypes, and high-fidelity UI designs using Figma.
- Collaborated with developers to implement responsive and user-friendly interfaces.

UI/UX Design Intern

May 2025 – June 2025

BYTO

- Designed user-centered interfaces and improved usability through structured design processes.

PROJECTS

Medical Appointment Booking System

May 2025

React.js, Node.js, MongoDB, JWT, Razorpay, Cloudinary

- Developed a healthcare platform enabling users to find and book doctors based on location, specialization, and availability.
- Implemented secure authentication and payment gateway integration.
- Designed scalable backend architecture to handle real-time user data efficiently.

Event Management System

Aug 2025

React.js, Node.js, MongoDB, JWT, Razorpay, Cloudinary

- Built a full-stack system for event creation, participant registration, and management.
- Integrated authentication, payment processing, and media upload features.
- Optimized APIs to improve response time and system performance.

Brain Tumor Detection System

Nov 2025

Python, Flask, VGG16, CNN

- Developed a deep learning model using transfer learning for MRI-based tumor detection.
- Applied preprocessing techniques to improve model accuracy and prediction reliability.
- Built a web interface for real-time predictions and visualization of results.

EDUCATION

Bachelor of Computer Applications (BCA)

GD Rungta College of Science and Technology, Bhilai

CGPA: 6.85/10

2023 – 2026

CERTIFICATIONS

- C Programming – Coding Spoon
- UI/UX Design – College Level Competition Winner

EXTRACURRICULAR ACTIVITIES

- Participated in national-level hackathons and multiple technical events, building AI-based web solutions in teams.
- Won a college-level UI/UX design competition.
- Delivered freelance web development solutions for clients.
